

1

Define your problem statement

What problem are you trying to solve? What your problem is a how-often-by statement. This will be the focus of your statement.

2

Explain

What does your idea look like? What is the problem you are trying to solve?

[View example](#)

PROBLEM 1

Other apps can't check the online activities of the users as per the iOS 14.5 update. The apps need to ask for permission before using the data of users before using the data anywhere. No one can track the user's online activities on the website of other apps with the iPhone.

PROBLEM 2

Brainstorming assists you with your creative process by allowing you to interact with your thought hierarchy in a very intuitive and engaging way. Discover themes, clouds, automatically generated from your initial subject.

Better yet, having a technology available to help you fine-tune your concepts is gold. Fortunately, with the ever-increasing capabilities of mobile apps and devices, users can now have a nearly limitless canvas to scratch out and rearrange ideas.

PROBLEM 3

According to Apple, Freeform helps users organize and visually lay out content on a flexible canvas, giving them the ability to see, share, and collaborate all in one place without worrying about details or page sizes.

PROBLEM 4

A brainstorm can happen anywhere, at any time. It can take place in a controlled group environment or while you're out and about headed to meetings or taking care of other tasks. Whether it's a scheduled activity or sudden inspiration, you need to be ready to get down your ideas.

Freeform is an Apple app designed to help users organize and visually lay out content on a flexible canvas, giving them the ability to see, share, and collaborate all in one place without worrying about details or page sizes.

Freeform is the perfect unobstructed experience for gathering inspiration and ideas all in one place. The infinite canvas expands as content is added to the board for unlimited flexibility when working with many files or collaborating with others.

Freeform is a new app designed to help users organize and visually lay out content on a flexible canvas, giving them the ability to see, share, and collaborate all in one place without worrying about details or page sizes.

iPhone and iPad users can draw anywhere on the canvas with their finger, and with support for Apple Pencil, Freeform makes it easier than ever to sketch ideas on iPad while on the go.

Freeform supports a wide range of files, including photos, videos, audio, documents, PDFs, links to websites and map location links, sticky notes, shapes, diagrams, and more. iPhone and iPad cameras can even be used to insert an image or scanned document directly into the board.

Splash, Water and Dust Resistant (Rated depth of 6 metres up to 30 minutes) under IEC standard 60529

As of the new update of the iPhone, the company has to develop their privacy practices to users and how they can collect data. Android only asks for data permissions and makes the users around privacy without having any idea of how and where the data will be used.

iphones still uses USB 2.0 lightning. That doesn't surprise me at all where Samsung, Realme, Honor, Huawei have transitioned to USB C 3.2 a long time ago.

Technology	USB
Announced	2021 Announced 2021 June
Status	Discontinued

iPhone and Android, both types of smartphones are in demand because of continuous updates and amazing user experience. To give you a better understanding, here are the main features that make the iPhone different and better than Android phones.
